## Personal Summary

A strong conceptual thinker who has a keen interest in all things related to the Internet. Rashik has the ability and experience needed to design and execute complex software projects for a diverse variety of users. He is committed to having an impact on the future of any company that he works for, and possesses the enthusiasm and commitment to learn and develop his career within a fast paced and growing business. He has a track record of building fluid and dynamic interfaces that are user-friendly, and which positively impact on people's lives. Right now he is looking for a suitable opportunity that will not only take his career to the next level, but will also allow him to work alongside a very specialized team.

## Areas of Expertise

- Turning broad, conceptual ideas into highly creative visual websites.
- Comprehensive knowledge of web-based programming languages like PHP, MySQL, .NET and MS SQL.
- Keeping up to date with current and emerging web technologies through relevant blogs, publications and events.
- Integrating new technologies into existing web properties.
- Experience of Design Patterns, Frameworks and Architecture.
- Experience of Object-oriented Software Development Methodologies.
- Experience in web APIs.
- Experience in Search Engine Optimization.
- Social media integration.
- Customized CMS creations.

## Personal Skills

- Always positive, regardless of the challenge ahead.
- Willingness to work with emerging alternative technologies.
- Developing professional relationships with the customers.
- Excellent communication skills and personal-interaction skills.
- Can work in fast paced environment while maintaining attention to detail.
- Willingness to take ownership of project and see them through to completion.
- Communicating clearly to both technical and non-technical audiences.
